PMA2020/BURKINA FASO
November 2017 - January 2018 (Round 5)
Performance Monitoring and Accountability 2020 (PMA2020) uses innovative mobile technology to support low-cost, rapid-turnaround surveys to monitor key indicators for family planning. The project is implemented by local universities and research organizations in 11 countries, deploying a cadre of female resident enumerators trained in mobile-assisted data collection. PMA2020/Burkina Faso is led by l’Institut Supérieur des Sciences de la Population (ISSP) at the Université Ouaga I Pr Joseph Ki-Zerbo. Overall direction and support is provided by the Bill & Melinda Gates Institute for Population and Reproductive Health at the Johns Hopkins Bloomberg School of Public Health though a grant from the Bill & Melinda Gates Foundation.

INDICATORS FOR ACCESS, EQUITY, QUALITY AND CHOICE

FAMILY PLANNING BRIEF

For Current Modern Contraceptive Users, Indicators by Wealth Tertiles

- Method Chosen By Self or Jointly (90.0%)
- Obtained Method of Choice (96.9%)
- Told of Other Methods (64.9%)
- Counseled on Side Effects (52.1%)
- Paid for FP Services (84.2%)
- Would Return to Provider and Refer a Friend or Family Member (86.3%)
- Received Method from Public SDP (88.1%)

Percent of Public Facilities Offering Family Planning with Methods in Stock on Day of Interview (n=115)

- 2.6
- 4.3
- 0.9
- 0.9
- 89.6
- 99.1
- 100
- 95.7
- 98.3

- Currently in stock, and no history of stock-out in the past 3 months
- Currently in stock, but history of stock-out in the past 3 months
- Current stock-out
- Not offered

*Distribution of the method was not yet scaled up nationally at the time of data collection.

Percent of Public Facilities With At Least 3 or 5 Modern Contraceptive Methods, by Facility Type

- Hospital 100.0 100.0
- Surgery Center 100.0 100.0
- Health Center 100.0 100.0
- Total 100.0 100.0

Service Delivery Points

- Among All Service Delivery Points (%) Offering Family Planning 100.0
- With Mobile Teams Visiting Facility in Last 12 Mths 52.2
- Supporting CHWs from this SDP 38.3

Among Service Delivery Points Offering FP Services

- Average Number of Days Per Week FP is Offered 6.9
- Offering Female Sterilization (%) 20.9
- Offering FP Counseling/Services to Adolescents (%) 100.0
- Charging General User Fees For FP Services (%) 17.4
- Availability of Instruments or Supplies for Implant Insertion/Removal (%) 94.8

Availability of Instruments or Supplies for IUDs (%) 100.0

*Among SDPs that provide implants. Instruments/supplies include: Clean Gloves, Antiseptic, Sterile Gauze Pad or Cotton Wool, Local Anesthetic, Sealed Implant Pack, Surgical Blade

**Among SDPs that provide IUDs. Instruments/supplies include: Sponge-holding forceps, Speculums (large and medium), and Tenaculum

SAMPLE DESIGN

PMA2017/Burkina Faso Round 5 used a two-stage cluster design with urban-rural strata. A sample of 83 enumeration areas (EAs) was drawn from the Institut National de la Statistique et de la Démographie (INSD) master sampling frame. In each EA, 35 households and up to three private service delivery points (SDPs) were selected. Up to three public SDPs serving that EA were also selected. Households were systematically selected using the “Random Number Generator” application. Occupants in selected households were enumerated, and eligible women (women of reproductive age, 15-49) were contacted and consented for interviews. Data collection was conducted between November 2017 and January 2018. The final sample included a total of 2,811 households (98.5% response rate), 3,512 females (97.8% response rate) and 130 SDPs (97.7% response rate).
