## JUNE-JULY 2018 (ROUND 6)

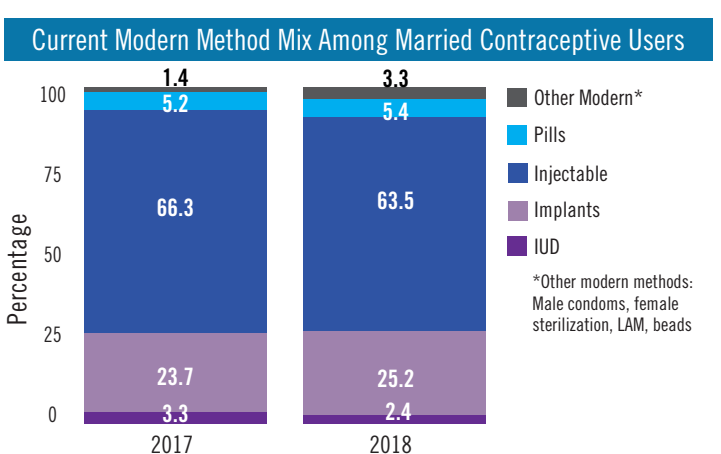

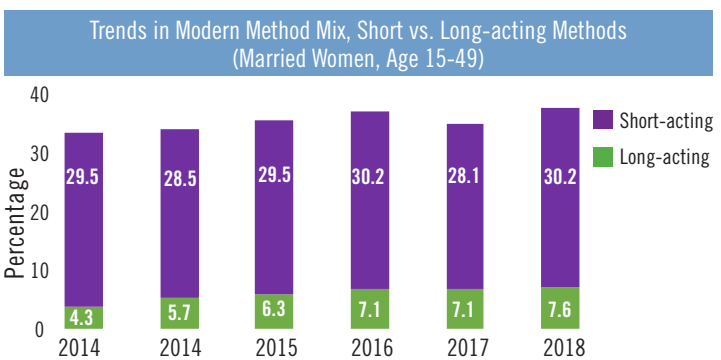

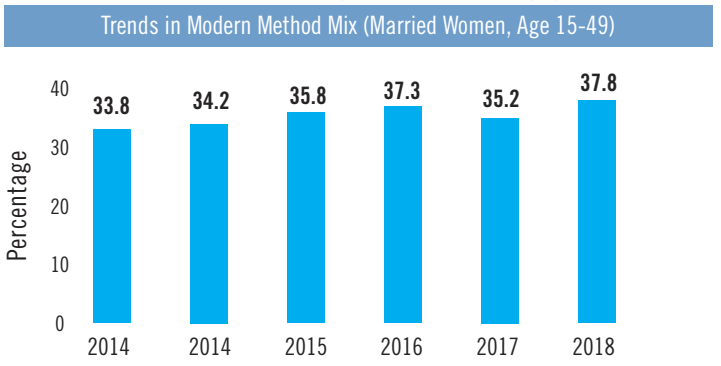

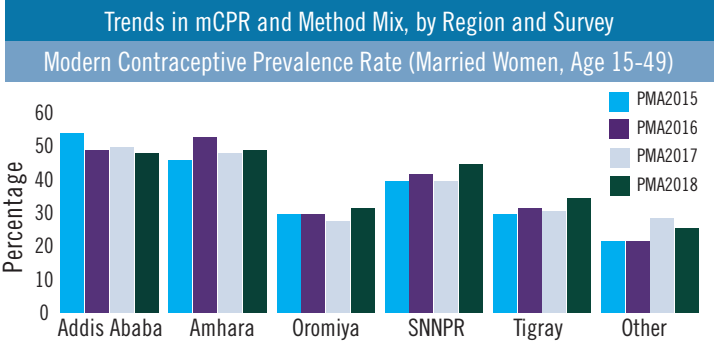

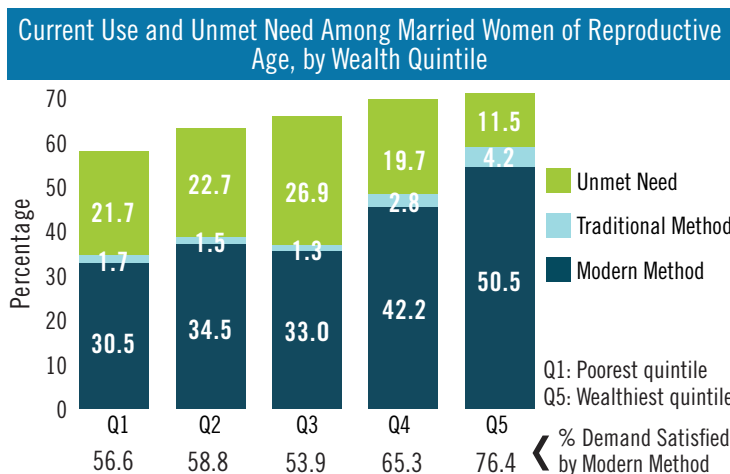

**Performance Monitoring and Accountability 2020 (PMA2020)** uses innovative mobile technology to support low-cost, rapid-turnaround surveys to monitor key indicators for family planning. The project is implemented by local universities and research organizations in 11 countries, deploying a cadre of female resident interviewers trained in mobile-assisted data collection. PMA2020/Ethiopia is led by the Addis Ababa University's School of Public Health at the College of Health Sciences (AAU/SPH/CHS), in collaboration with regional universities, the Federal Ministry of Health and the Central Statistics Agency. Overall direction and support is provided by the Bill & Melinda Gates Institute for Population and Reproductive Health at the Johns Hopkins Bloomberg School of Public Health and funded by the Bill & Melinda Gates Foundation.

### SAMPLE DESIGN

PMA2018/Ethiopia-R6 used a two-stage cluster design with urban-rural, major regions as strata. This survey round used the same 221 enumeration areas (EAs) from the previous round drawn by the Central Statistical Agency from its master sampling frame. For each EA, 35 households and 3-6 health service delivery points (SDPs) were selected. Households were systematically sampled using random selection. Households with eligible females of reproductive age (15-49 years) were contacted and consented for interviews. The final sample included 7,621 households, 7,429 de facto females and 465 SDPs (99.2%, 98.6% and 97.7% response rates respectively). Data collection was conducted between June to July 2018.
